

Special Registration Instructions

If you are registering for a family or a team, each competitor will have to be entered one at a time. Once all the competitors are entered proceed to the checkout where all the waivers can be signed online or printed, and the entries can be paid for.

Please bear in mind that the contact information will be used in the event of a problem or an emergency, so please use the address, phone number and email address that makes the most sense. In the case of a family registration, this might be one point of contact based in the family home. In the case of a school team, this may be the address of the school and the cell phone and email address for the coach or instructor.

Please note that if you use the same contact information over and over again, your web browser will probably remember these values and allow you to enter them by typing in the first character in each, perhaps using the arrow keys to select, then hitting Enter or tab as the case may be. This is very browser and setting dependent, but please give it a try.

Please note that the waiver for each competitor must be signed by that person, whether online or printed and mailed in to the registrar. As always, the waiver for a ward or minor must also be signed by a guardian or parent. If you are a coach who is registering team members you may find it more convenient to forward the email receipt for each student to the parent of that student. Each email will have a link to the waiver that can be signed by the parent and minor student online by clicking on it. Alternatively, you could print the waiver, have the waiver signed by the parent and minor student, retrieve the waiver and then mail it in to the registrar.
